Workholding Solutions

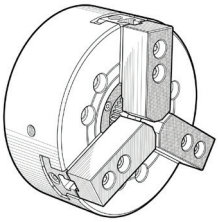
SEOAM Workholding Lineup
Diverse High-Performance Tooling Options

COMPREHENSIVE LINEUP:
Explore our full range of workholding solutions to optimize your production efficiency.

LEARN MORE:

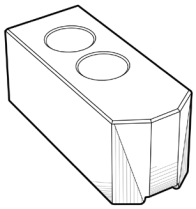
SEOAM Chucks & Cylinders



Kenyeri Engineering offers premium SEOAM chucks and cylinders designed to maximize accuracy and efficiency in your turning operations. Whether you operate horizontal or vertical machines, our standard solutions ensure reliable workholding for every standard production run.

- Horizontal Lathes Solutions
- Vertical Lathes Solutions
- Manual Chucks for Rotary Tables

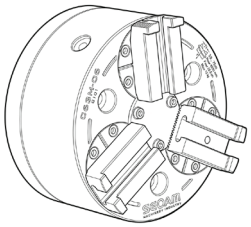
SEOAM Parts



Keep your machining processes running smoothly with our high-quality replacement parts. We provide durable components precision-built to fit a wide range of leading manufacturing equipment, securing your setups and reducing unexpected downtime.

- Soft Jaws
- Hard Jaws
- T-Nuts

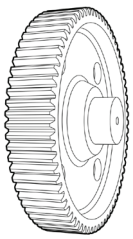
SEOAM Engineered Solutions



For your complex and secondary machining operations, we optimize your processing times with specialty designs engineered to handle everything from castings to delicate automotive parts.

- Universal Ball Lock Chuck
- Pin Arbor Chucks
- Shaft Chucks
- OD Collet Chucks
- Wheel Chucks
- Indexing Chucks

SEOAM Curvic Couplings & Gears



Achieve superior stability and micro-precise accuracy with our robust line of curvic couplings and high-end gearing. Specifically heat-treated for long-term durability, these heavy-duty components excel in demanding compressor, marine, and renewable energy systems.

- Curvic Coupling
- Marine Engine Gear Intermediate
- Pinion Windmill
- Speed Reducer Gear
